

Juki And i360

i360 have been a pleasure to work with and have gone above and beyond the originally briefed project. A rewards program for the Russian market is not an easy task with many regulations and processes not seen in the EU but every step of the way i360 were able to deliver on our needs.

The knowledge base of staff was a huge asset to us in Juki as many potential issues were highlighted before we went live and using the pre-built framework meant that we avoided mistakes that would have derailed the project. There was never a function or idea that was not possible with i360 and they actively suggested improvements before and even after launch.

We are very happy that we selected i360 for the Juki Smart Rewards Program in Russia, their experience and ideas made the project a success.
